Eftpos is available on site

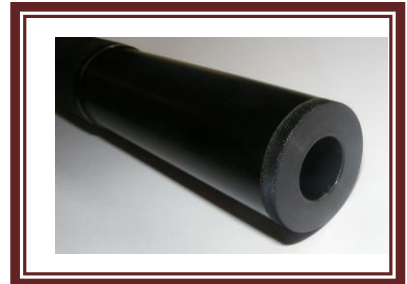

Accounts must be paid in full before firearms will be released.

GUNWORKS GLOSSARY FOR DEFINATIONS AND MORE INFO

Delrin Bush Suppressor - Has interchangeable nylon bush at rear that can be bored out to fit any barrel up to 19mm diameter. Can be fitted to other rifles using an additional bush (\$20 + GST per additional bush). There is no extra cost but it must be requested. Suppressor can only be used on rifles down a calibre not up a calibre, ie can't put a .308 suppressor on a 270 wsm but can put a .308 on a 7mm-08 etc. Check out our universal suppressor guide to see what calibers you can interchange between. Important – a custom made suppressor cannot be altered to a suppressor with a bush. Delrin bush suppressors must be made from scratch

Custom Made Suppressor – This suppressor is made to fit one rifle only. If in the future you sell your rifle, it is a good idea to sell the suppressor with it as it has been made for this rifle only and its very, very difficult (and can be impossible due to the internals) to fit it to another rifle.

Stainless Internal Muzzlebrake – All of our suppressors have an internal muzzlebrake. Our stainless Steel version will last 20,000 rounds but weighs approx 81 grams.

Aluminium Internal Muzzlebrake – All of our suppressors have an internal muzzlebrake. Our aluminium version will last 5,000 – 6,000 rounds but weighs approx 30 grams, between 50-55 grams lighter – please note, at this stage, this option is not available on wsm's and magnums
